## Summary

Aspiring API & Backend, Front-End developer 1.5 years experience in online brand promotion and acquisition using [social media channels]. Recently, I pivoted my career from digital marketing to website & application backend development due to my passion for API & Backend | Front-End development and problem-solving abilities.

Currently , I focus on creating and testing API with some operations and security using documentations, some books and by videos. I typically use FASTAPI & DRF & Django-Ninja for write API and HTML/CSS & React JS for make Front-End web sites and http for communications between client and server.
